

Health Economics & Outcomes Track (Fall Starter) (30 Credits Total)

The Health Economics & Outcomes track is intended for those who are interested in the process of quantifying inputs into health care systems and outputs from health care systems. Students in this track will learn how to place both economic and human values on products and services, as well as economic and human values on the results produced by those products and services. Graduates in this track will find employment with pharmaceutical manufacturers, large medical centers, prescription benefit management companies, and health insurance companies. They will also find career openings with federal and state government agencies as well as non-government agencies.
