

### Health Institution Leadership (Fall Starter) (30 Credits Total)

The Health Institution Leadership track welcomes students who have aspirations in the area of administration within a hospital, clinic, long-term care facility, or other institution in which health care is provided to patients. Many students in this track are experienced clinicians who are planning to shift their careers into management areas that require expertise in finance, personnel administration, and strategic planning. The goal of the health institution leader is to develop systems that promote efficient and high-quality health care, with respect for patient rights and needs, and recognition of the special commitment brought to the workplace by those who have taken an oath to serve the health care needs of the public.
